

PEST PREPARATION GUIDE · HOME & BUSINESS

General Pest Control

A few simple steps before any general pest treatment help your Terra13 technician find activity, reach problem areas and treat safely — and good aftercare keeps pests from coming back.

Home & business

No-wash 14 days

All common pests

BEFORE THE TECHNICIAN ARRIVES

Tick each box as you prepare

1 Point out activity

- Show where pests appear and when activity is highest

2 Clean up

- Crumbs, spills, pet food, garbage areas and moisture

3 Clear access

- Baseboards, doors, windows, closets and utility areas

4 Seal food

- Store food and pantry goods in sealed containers

Re-entry time — ask your technician

Re-entry timing varies by pest and treatment method. Follow the time your Terra13 technician gives you before returning to treated areas.

CLEANUP & AFTERCARE

Right after treatment

- Don't wash treated cracks, edges, baseboards or entry points for 14 days
- Avoid store-bought sprays near treated areas

Keep it going

- Keep sanitation and food-storage routines consistent
- Monitor activity and contact Terra13 if pests return
