

PEST PREPARATION GUIDE · APARTMENT UNITS

Rodent Extermination

Rodent slip through tiny gaps and nest in kitchens, walls and behind appliances. A little prep lets your Terra13 technician place bait stations quickly and safely.

- Apartment units
- 15–30 min on site
- Bait station treatment

BEFORE YOUR APPOINTMENT

Tick each box as you prepare

1 Provide access to key areas

- Clear access to kitchens, storage and utility spaces
- Open up under sinks, behind appliances and along walls
- Move items slightly away from walls where possible

2 Kitchen preparation

- Empty and clear under-sink cabinets
- Remove items from lower cupboards if requested
- Wipe up food crumbs and spills

3 Reduce food sources

- Store food in sealed plastic or glass containers
- Don't leave food or pet food out overnight
- Keep garbage sealed and emptied regularly

4 Reduce clutter

- Clear clutter from floors, corners and storage
- Keep baseboards and wall edges accessible

Safety — pets & children
Keep pets and children away from all bait stations. Never touch or move a station once your technician has placed it.

ON THE DAY & AFTER

During the service

- Stations are placed in kitchens, closets and along walls
- Most visits take 15–30 minutes, depending on unit size

After the service

- Leave all bait stations exactly where placed
- Keep up good sanitation and food storage
- Report any new mouse activity to Terra13
